China's iron ore imports rose 1.5% over January and February from the same period a year earlier

The General Administration of Customs said last month it would combine preliminary trade data for January and February instead of releasing data for individual months

In the first two months of the year, the world's top steel producer brought in 176.8 million tonnes of the steelmaking ingredient, according to the customs data, compared with 174.3 million tonnes a year earlier.
