• Panamax shipping rates declined by 10.17%

The Panamax 5 time-charter average yielded a loss of \$1,326 on the week to publish on closing at \$25,447, which is a realistic reflection of the corrective week the Panamax market has experienced following last week's dramatic rises. Rates in the Atlantic basin eased as demand faltered and pressure slowly built on the nearby position with fewer options for Owners to consider. The Asian market proved to be something of a two-tier market, the north supported with healthy grain demand ex NoPac with rates typically around \$29/30,000 for 82,000-dwt agreed occasionally. Further south, pressure built in the southern positions with limited activity here. The resultant large spread between the bid and offer curtailed activity with nearby tonnage reducing rates in order to get fixed. Late in the week there were some murmurs of a rebound, aided by renewed support in FFA's. It will be interesting to see how this plays out next week.

• Supramax shipping rates declined by 8.98%

There was a change of direction with rates easing in most areas including Asia. Despite the overall negativity, news of period activity still surfaced with a 63,000-dwt new building being fixed for one year at \$20,500. The Atlantic saw less fresh enquiry from the US Gulf, a 58,000-dwt fixing a petcoke cargo to west coast central America at around \$26,000. Further south, rates from east coast south America eased as well, a 57,000-dwt being linked to a trans-Atlantic run in the mid/upper \$20,000s. In Asia a 63,000-dwt was reported fixed basis delivery Singapore for a trip via Indonesia redelivery India at \$28,500. Otherwise a 55,000-dwt fixed a trip basis delivery south China via Philippines with nickel ore redelivery south China in the mid \$20,000s. There was still enquiry from the Indian Ocean. A 58,000-dwt fixing a coal run from Richards Bay to west coast India at \$16,250 plus \$625,000 ballast bonus.
